

GSK and Hartlepool & Stockton Health LTD Collaborative Working Executive Summary

Improving equitable access to National Adult Immunisation Programmes in the Hartlepool and Stockton-on-Tees areas

Hartlepool & Stockton Health LTD (H&SH) and GSK are undertaking a Collaborative Working project together as part of a larger Adult Immunisation Programme Optimisation Project.

The aim of this project is to address healthcare inequality in the Hartlepool and Stockton-on-Tees area by supporting the increased uptake of the Shingles and Pneumococcal National Immunisation Programmes (NIPs) across H&SH NHS practices. Hartlepool and Stockton-on-Tees have both been identified as areas of greatest need due to high levels of deprivation and lower than average uptake for some adult vaccinations (excluding flu and COVID).

The project will involve provision of non-clinical staff (Primary Care Immunisation Facilitators) via a third-party into H&SH operated primary care practices to support with eligible patient search/identification and call/recall in Shingles and Pneumococcal National Immunisation Programmes. Resource allocation will be worked out with H&SH to ensure that the most deprived practices in each area are prioritised as appropriate. Clinical review of eligible patients for vaccination, and the administering of the vaccinations to patients will remain the responsibility of H&SH.

A Summary of Outcomes Report will be published on the GSK website within six months of project completion.

Primary project objectives:

1. Reduce patient health inequalities and patient suffering from vaccine preventable diseases (shingles and pneumococcal disease).
2. Increase the uptake of shingles and pneumococcal vaccination in line with the NIP eligibility criteria in H&SH practices.
3. Leave a sustained legacy of enhanced immunisation programme implementation by enhancing knowledge, capability, and effective ways of working.

Project Contribution:

The project will run from November 2024 to April 2025, and will involve a balance of contributions from all parties, with the pooling of skills, experience, and resources, with estimated costs outlined below:

GSK:

- £146,700.48 covering
 - £115,077.12 for the provision of Primary Care Immunisation Facilitators
 - £31,623.36 on project management

H&SH:

These contributions are not direct monetary contributions, but are a reflection of the estimated amount of hours that will be required to implement the project, and the value of that time.

GSK and Hartlepool & Stockton Health LTD Collaborative Working Executive Summary

Improving equitable access to National Adult Immunisation Programmes in the Hartlepool and Stockton-on-Tees areas

- £78,105.58 covering
 - £56,308.80 on Clinical Workforce
 - £21,022.72 on Administrative Workforce
 - £774.06 on above practice-level organisation

Intended benefits:

Patient:

- Increased protection from shingles and pneumococcal disease, likely resulting in improved health outcomes through greater uptake of vaccination.
- Reduced health inequalities and reduced patient suffering from shingles and pneumococcal disease.
- Fewer shingles and pneumococcal cases and related complications, which could lead to fewer hospitalisations and management of chronic pain.
- Improved experience of the healthcare system through engaging in improved vaccination service provision.

NHS (H&SH):

- Increased uptake of shingles and pneumococcal disease vaccination in line with national guidance.
- Improved long-term capability to implement and deliver adult immunisation programmes.
- Reduced administrative burden on practice staff for implementing immunisation programmes.
- Reduced prevalence of shingles and pneumococcal disease resulting in reduced healthcare utilisation in both primary care and any associated complications and hospitalisations.
- Share learnings across H&SH organisations to improve NIP implementation best practice, leading to increased uptake.
- Transfer of knowledge to local practice administrative staff through training and upskilling from Primary Care Immunisation Facilitator.
- Systems/frameworks and administrative solutions implemented for effective patient recall.
- Searches left on practice system after Immunisation Administrator 'placement' for practice staff to utilise.
- Increased patient satisfaction with practice provision of vaccinations.

GSK and Hartlepool & Stockton Health LTD Collaborative Working
Executive Summary

Improving equitable access to National Adult Immunisation Programmes in
the Hartlepool and Stockton-on-Tees areas

GSK:

- Leave a legacy within H&SH practices of sustained successful implementation of pneumococcal and shingles immunisation programmes.
- Demonstration of the effectiveness of Collaborative Working in driving implementation of vaccination across Hartlepool and Stockton-on-Tees.
- Increased uptake of the approved Shingles NIP and its approved guidelines.
- Support GSK's commitment to being ambitious for patients.
