

## Virtual interviewing guide

Whether you're interviewing on the phone or online, we want to support you to prepare and perform at your best.

Here are our 6 top tips:

1. Use a stand or books to prop your laptop on so it's at the right level for video calls.
2. Familiarise yourself with the technology you'll be using.
3. If you have family members or pets at home, let the interviewer know there might be some background noise.  
Use headphones to make the call if possible.
4. Ensure you have a strong internet connection.
5. Minimise background noise by closing all windows and doors.
6. Don't panic - we'll do everything that we can to make you feel comfortable and if you have any questions before, during or after the interview, just ask.
